PROFILE

Senior Frontend Engineer with 10+ years of experience delivering scalable, high-performance web applications in enterprise and data-intensive domains.

Expert in React ecosystem, frontend architecture, and large-scale migrations (Angular → React).

Strong product mindset with end-to-end ownership: from system design to production delivery.

Experience integrating AI features (LLM, semantic search) into real-world products.

Actively growing into a Tech Lead role: mentoring, architectural decisions, cross-team collaboration.

KEY IMPACT

- Led Angular → React migration without disrupting ongoing development
- Built AI-powered documentation search (OpenSearch + LLM)
- Designed complex analytical and data visualization interfaces
- Delivered financial product UIs for large-scale retail platform
- Mentored engineers and contributed to team scalability

TECH STACK

Frontend: React, Next.js, TypeScript, Angular, JavaScript, Vue, Redux, RxJS

Architecture: Scalable Frontend Architecture, Design Systems, Enterprise UI

Data & APIs: GraphQL, REST API

AI: LLM integrations, AI search, OpenSearch

Infrastructure: Docker, CI/CD, Jenkins, Git

Databases: PostgreSQL, MySQL, MS SQL, Teradata

Testing: Jest, Vitest

EXPERIENCE

Senior Frontend Engineer — Arenadata (2022 — Present)

- Owned frontend architecture and delivery for multiple data-platform products
- Key contributor to Angular → React migration strategy and execution
- Developed complex UI for managing distributed data infrastructure
- Improved usability of complex data interfaces, making them more accessible for end users
- Collaborated closely with product managers and designers to deliver user-centric solutions

- Built AI-powered documentation search (OpenSearch + LLM)
- Designed scalable frontend-backend integrations
- Mentored junior engineers

Tech: React, Next.js, TypeScript, Angular, OpenSearch

Senior Frontend Engineer — M.Video – Eldorado (2021 — 2022)

- Delivered financial product interfaces (credit & installment flows)
- Enhanced user experience for financial flows, improving clarity and reducing user friction
- Implemented complex business logic and validation layers
- Improved user journeys for financial applications

Tech: Angular, TypeScript, RxJS, GraphQL

Frontend Engineer — PARMA Technologies Group (2018 — 2021)

- Built analytical systems for government clients
- Developed dashboards and geospatial data visualizations
- Improved accessibility and usability of data monitoring interfaces
- Contributed to COVID monitoring platform

Tech: Angular, Vue, JavaScript, PostgreSQL

Full Stack Developer — Tander & Academic Projects (2013 — 2018)

- Built internal data processing and reporting systems
- Optimized SQL queries and data pipelines
- Automated reporting workflows

Tech: JavaScript, SQL, PHP

PROJECTS

AI Telegram Assistant (Education)

- Built LLM-based assistant for learning support
- Implemented question generation and explanations

Tech: Python, Telegram API, LLMs
